Hitch Racks for All Types of Bicycles

Your Specialty Rack Specialist

Atoc Inc.

(425) 745-2131

(800) ATOC-021

www.Atoc.com

Crafted with pride in the USA

Versatile

The DraftMaster system can be configured to carry almost all 2 or 3 wheeled bicycles. The basic system works with traditional singles and SWB recumbents. Specialty attachments are available to accommodate tandems, recumbents, and trikes.

Familiar Mounting System

Fork & rear wheel mounting system accommodates all bicycles, including women's and exotic frames.

Direct Access To Bicycles

DraftMaster's unique design allows direct access to any of your bicycles at any time without removing the others.

Accessories Available

Front wheel carrier - holds 4 wheels
Topper Lok security skewer & ML605 padlock
Security Hitch Bolt

Quick-Connect, Modular Design

DraftMaster's major components are modular and assemble without tools using a quick-connect system. This lets you remove components when not using them. You can also swap components to reconfigure your DraftMaster for different purposes.

Easy Vehicle Access

The DraftMaster pivots back about thirty inches. This allows access to the rear of most vehicles.

Carry More

Holds up to 5 bikes, including tandems, recumbents, and trikes.
