Installing your Bike Topper™

Using your Bike Topper™

! Failure to use the skewer properly may result in the loss of your bicycle. A properly adjusted skewer requires firm hand pressure to close. When you close the skewer with the palm or heel of your hand, the skewer handle should leave a distinct impression on your hand. Do not tighten the skewer by using the skewer handle as a wing nut or wing nut. If you have any questions, please contact your Atoc dealer.

When not carrying a bicycle, wrap the wheel strap around the Topper beam.
